PROFILE

Detail-oriented professional with experience in software development, programming instruction, and administrative operations. Experienced in system analysis, testing, and quality assurance, with strong problem-solving abilities and a detail-oriented approach to delivering reliable, efficient, and high-quality solutions.

SKILLS

- Technical Skills:** C++, Java, Flutter & Dart Programming | Node.js (Backend Development) | HTML & CSS (Frontend Development) | MySQL & MongoDB Atlas (Database Management) | Heroku CLI (Hosting & Deployment) | Google App Script & API Integration | Git, GitHub, & VS Code | Deep understanding of the Software Development Life Cycle (SDLC) | Proficient in creating System Designs including Use Case Diagrams and System Architecture based on Kendall & Kendall methodologies | Technical Diagramming & Design using Draw.io and Canva (Diagrams & Publication Materials)
- Personal Skills:** Strong team collaboration and independent project execution | Adaptable with excellent communication skills | Creative problem-solving and time management | Attention to detail with leadership qualities | Detail-driven in system analysis, utilizing rigorous testing to ensure overall quality

TOOLS & PROFICIENCIES

- Development Environments** (VS Code, Android Studio) | **Programming Languages** (C++, Java, Flutter/Dart, JavaScript) | **Web Development** (HTML, CSS) | **Version Control** (GitHub) | **Databases** (MongoDB Compass & Atlas, MySQL Workbench) | **AI Tools** (Gemini, Copilot, ChatGPT, GitHub Copilot) | **Productivity Suites** (Google Workspace: NotebookLM, Docs, Slides, Sheets, Drive, Gmail, Apps Script; Microsoft 365: Excel, Word, PowerPoint, OneDrive) | **Communication & Collaboration** (Zoom, Google Meet, Gmail) | **Design Platforms** (Canva)

PROJECTS

- ADTS (Asset Distribution Tracking System)** *Flutter, Dart, Node.js, MySQL*
 - Developed a mobile asset management system for the Local Government Unit (LGU) of General Santos City — City Accountant's Office. Implemented real-time asset tracking, OTP-based secure authentication, and an intuitive UI for efficient distribution management.
- Famie and FamKid (Parental Control Applications)** *Flutter, Dart, Node.js, MongoDB Atlas, Heroku*
 - Developed as part of the thesis "Optimizing Screen Time Management for Children's Devices," Famie (for parents) and FamKid (for children) are mobile apps that promote healthy digital habits using token bucket and time-based algorithms for screen time control, with secure device pairing via QR code scanning.
- CETE Quiz Game** *HTML, CSS, Node.js, MongoDB*
 - Created for our College intramurals event to introduce participants to web application development. Developed a dynamic quiz game platform featuring user authentication, real-time scoring, and a MongoDB database for managing quizzes and results.
- TicTacToe Mobile Game** *Flutter, Dart, Node.js, MongoDB*
 - Designed a simple two-player TicTacToe mobile game to showcase mobile app development and demonstrate core Flutter UI practices and game state management during a College Open House department exhibit.

WORK EXPERIENCE

- Part-Time Faculty** (College of Engineering & Technology Education Department | Junior High School Department)
Holy Trinity College of General Santos City — General Santos City **Jul 1, 2025-May 31, 2026**
- Delivered C++, Java, and Game Development courses through lectures and hands-on programming activities, improving students' understanding of software development concepts and coding practices relevant to real-world application development.
 - Guided Junior High School students in designing and developing mobile applications using MIT App Inventor, resulting in functional mobile projects while strengthening skills in software design, testing, and troubleshooting.
 - Mentored **Senior High School students as a Research Adviser**, leading them through proposal development, implementation, and project completion, enhancing analytical thinking, documentation, and problem-solving skills.
 - Evaluated Information Technology and Computer Science research proposals as a **Research Title Panelist**, providing recommendations that improved project feasibility, technical quality, and system planning.

Intern

- City Accountant's Office (CAO) — General Santos City** **Feb 4, 2025 - Mar 26, 2025 (256 hours, ext from 162 hours)**
- Developed the Asset Distribution Tracking System (ADTS) for the LGU of General Santos City – City Accountant's Office, enabling real-time management and tracking of government assets, improving asset visibility and record accuracy across the office.
 - Implemented OTP-based authentication, centralized asset records, and real-time tracking features, enhancing data security and monitoring efficiency, supporting reliable asset accountability and compliance with office procedures.
 - Automated asset documentation and reporting processes through ADTS, reducing manual record-keeping efforts and minimizing data inconsistencies, allowing more efficient asset management and timely record updates.

EDUCATION

- BACHELOR OF SCIENCE IN COMPUTER SCIENCE** **Holy Trinity College of General Santos City | Graduated - 2025**
- TRAININGS & SEMINARS:** Advanced Database Management Systems | Introduction to Data Analytics | Structuring and Formatting IEEE Papers: Essential Guidelines | Cybersecurity Awareness on National Women's Month 2025 | Safer Internet Day 2025 | ICT Trends in Cybersecurity and Big Data Analytics | AI for Digital Transformation (Including Generative AI) | Unveiling Tomorrow: The Force of Artificial Intelligence and Machine Learning | Artificial Intelligence for Education and Entrepreneurship | STARTUP TALK Series 2025 – Session 3 | Development Conference (DEVCON) 2023.
